

Dear Retailer:

Thank you for choosing to sell Iowa Lottery products. Lottery tickets have been sold in Iowa since 1985 and profits have been used in various ways throughout our history including funding for economic development, environmental and cultural programs, general fund revenues and veteran causes.

Selling lottery tickets will bring customers in your door and paying customers for winning tickets will put cash in their hands that can be spent while in your business. Studies have shown that customers who buy lottery tickets as part of their shopping experience spend more money in retail locations than non-lottery purchasing customers.

In this packet, we are providing you with guidelines for selling lottery tickets and information on how you can contact the lottery when needed. As any information provided in this packet changes, the updates will be delivered to your store and posted on our web page. On a regular basis, a lottery representative will visit your store, deliver or authorize tickets and discuss the lottery topics for that week. Working together, we can make the sale of lottery tickets fun for your customers and profitable for you.

This information is effective April 2024. The official updated information can be found at: <https://www.ialottery.com/PDF/Retailer/RetailerGuidebookApril2024.pdf>

Thanks again for selling Iowa Lottery products.

CONTACTING THE LOTTERY

Iowa Lottery Locations

The Iowa Lottery has four locations statewide. Each Regional Office is responsible for the retailers within their region and payment of prizes. Prizes up to and including \$250,000 may be claimed at the Regional Offices. Prizes over \$250,000 and occasional special prize packages must be claimed at the headquarters office in Clive. Office hours are Monday through Friday from 8:00 a.m. to 4:00 p.m.

Lottery Security

The Iowa Lottery Security Department is located in Lottery Headquarters listed below. Lottery Security investigators are available to help you with any lottery security issue you may encounter. If you need to contact an investigator call 515.725.7900 and ask for the Security Department.

Lottery Headquarters:

13001 University Ave
Clive, IA 50325-8225
Phone: 515.725.7900

Cedar Rapids Regional Office:

2345 Blairs Ferry Rd NE
Cedar Rapids, IA 52402-1918
Phone: 319.395.9313

Mason City Regional Office:

2900 4th Street SW
Mason City, IA 50401-1531
Phone: 641.424.6011

Storm Lake Regional Office:

822 Flindt Drive
Storm Lake, IA 50588-3205
Phone: 712.732.6662

SELLING TICKETS

Purchasers must be 21 Iowa Lottery tickets shall not be sold to persons under the age of 21.

Who can sell lottery tickets Lottery tickets may be sold only on the licensed premises by a licensed retailer or an employee of a licensed retailer who is authorized to sell lottery tickets. If the retailer is a nonprofit organization, members of the organization may also sell lottery tickets if authorized by the organization. The retailer is responsible for the conduct of its employees and members that is within the scope of the retailer's lottery license. There is no age requirement for employees or members who sell tickets.

Prize payment to minors If the person entitled to a prize is under the age of 18, the payment of the prize may be made by delivery of cash or a check payable to the order of the minor or to a parent or legal guardian of the minor. Claim forms and tickets submitted by minors must also be signed by a parent or legal guardian of the minor.

Credit prohibited Lottery tickets shall not be charged to credit cards or purchased on credit.

Debit card Lottery tickets may be purchased with debit cards, as the funds used to pay for the transaction come directly out of the player's bank account. Retailers may not add a surcharge due to the use of a debit card.

Store gift cards Lottery tickets may be purchased with gift cards, which are a cash equivalent.

Checks Lottery tickets may be purchased with a check, as the funds come directly from a player's bank account. As with any other retail purchase, retailers are not required to accept checks for the purchase of lottery tickets.

Price Lottery tickets are to be sold only at such prices as are fixed by the Lottery and are not subject to sales tax. When entering lottery sales in your cash register, do so under a non-taxable key. Also remember that when filing your state sales tax, you do not have to report Lottery tickets as taxable.

System hours of operation The Lottery sales day begins/ends at midnight each day. The terminal is available for sales at approximately 12:20 AM and the close of the sales day is midnight. The start or close of the sales day may vary due to factors such as system maintenance being performed, high sales levels or software updates. Instant-scratch, pull-tab and lotto tickets may be redeemed and lotto tickets may be sold whenever the Lottery computer system is operational.

Sales requirements The Lottery may specify minimum sales quotas that must be met to sell products or possess a Lottery terminal or vending machine.

Maximize sales You can maximize sales by doing a few simple things:

- Locate your tickets in high-traffic areas. Ticket dispensers located next to the main cash register(s) and unobstructed from view by other merchandise will produce the highest sales.
- Kiosks and Pull-tab Vending Machines (PTVM) should be kept full of tickets.
- Kiosks and PTVMs must be placed in the view of a clerk.
- Lottery Point of Purchase (POP) materials should be placed to bring awareness of new games and promotions.
- Jackpot Alerts inform customers of the current jackpot and remind them to play.

Detailed information A copy of the Licensing Terms and Conditions is included in this guidebook.

CASHING TICKETS

General

1. All tickets must be signed before they can be checked or validated. The customer receipt must be presented to the player.
2. Instant-scratch, pull-tab and lotto tickets can be redeemed whenever the Lottery computer system is operational.
3. If prizes are paid out through a cash register, the lottery suggests using a paid-out key to record this transaction.

Instant-scratch tickets

1. All instant-scratch tickets must be validated through the terminal so that credit is issued for the tickets you have paid. The customer receipt must be presented to the player.
2. Prizes up to \$100 may be redeemed at any retail location.
3. Prizes from \$101 to \$600 may be paid by the retailer if sufficient funds are available.
4. Prizes over \$600 must be redeemed at any Lottery office.
5. After the ticket has been paid, staple the cash receipt to the ticket and keep it to balance out your cash drawer and then mutilate the ticket so it cannot be presented again for payment.

Pull-tabs

1. When pull-tabs are scanned through the terminal, the message you receive identifies whether the ticket was sold by you or someone else.
 - a. "Sold Here" means that the ticket was sold by your location and you must pay the prize.
 - b. "Not Sold Here" means that the ticket was sold by another location and you should NOT pay the prize.
 - c. Prizes up to and including \$600 must be paid by the retailer that sold the ticket.
 - d. Prizes over \$600 must be redeemed at any Lottery office.
2. After the ticket has been paid, keep the ticket to balance out your cash drawer and then mutilate the ticket so it cannot be presented again for payment.

On-line Lotto games (Lotto)

1. All lotto tickets must be validated through the terminal so that credit is issued for the tickets you have paid. The customer receipt must be presented to the player.
2. Prizes up to \$100 may be redeemed at any retail location.
3. Prizes from \$101 to \$600 may be paid by the retailer if sufficient funds are available.
4. Prizes over \$600 must be redeemed at any Lottery office.
5. After the ticket has been paid, staple the cash receipt to the ticket and keep it to balance out your cash drawer and then mutilate the ticket so it cannot be presented again for payment.

ACQUIRING INSTANT-SCRATCH AND PULL-TAB TICKETS

The Iowa Lottery has a sales team of District Sales Representatives (DSR). You will have a DSR assigned to your store. Your DSR will visit your store on a regular basis; however, delivery schedules may be altered due to holidays and weather conditions.

While in the store your DSR will:

- Work with you to determine how many packs of instant-scratch or pull-tab tickets you need that week and either deliver the tickets or authorize the tickets to be shipped to you.
- Process any instant-scratch tickets that need to be returned to the Lottery.
- Inform you about lottery promotions and new games.
- Educate your employees on how to run the terminal or work with lottery products.
- Place advertising and promotional signage.

The Lottery will work with you when establishing an order. The order may be delivered in one of two ways:

1. After the order is established, the DSR may authorize the tickets to be shipped to your store. When the order arrives, you will:
 - Sign for the delivery
 - Open the bag
 - Balance the tickets against the enclosed manifest
 - Scan the barcode on the manifest to complete the delivery of the tickets
2. After the order is established, the DSR may fill the order immediately. The DSR will utilize the lottery terminal in your store to transfer the tickets from lottery inventory to yours. This is accomplished by scanning the bar code on the tickets.

Retailers may also purchase tickets directly from a Lottery Regional Office during normal business hours.

PAYING FOR TICKETS

You are required to pay for Lottery tickets by means of an electronic funds transfer from your bank account. Each week, on Friday, the Lottery will either credit or debit your account for the amount of the transactions for that billing cycle. The Lottery's accounting week runs from the start of sales on Sunday through end of sales on Saturday. You will pay for all of the instant-scratch and pull-tab tickets that are "settled" each week in addition to any lotto sales that were made that week. The total amount due will be transferred from your account by electronic funds transfer on the following Friday.

Instant-scratch tickets are sold by the pack. With the exception of \$50 instant-scratch tickets which have a \$1,000 retail value, all other packs of instant-scratch tickets have a \$300 retail value (the number of tickets at each price point per these packs has been adjusted to equal the \$300 value). Packs of instant-scratch tickets are settled when the first of the following scenarios occurs:

1. 45 days have elapsed since delivery; OR
2. 70% of the winning tickets in a pack have been redeemed; OR
3. Other terms agreed to by the retailer and the Lottery – settled upon delivery, for example.

Pull-tabs are sold by the unit. Units of pull-tabs are settled immediately upon delivery.

The cost of all settled packs of instant-scratch tickets and delivered units of pull-tabs is added to the cost of all lotto tickets sold for the accounting week. All credits and adjustments are applied against the total amount due. A summary of the week's transactions, known as the Weekly Settlement Report, is available on your lottery terminal on Sunday as the new accounting week begins.

Additionally, a detailed weekly statement is available. Your DSR will discuss this option with you. Also available are activation/return and adjustment reports if you have questions concerning any transaction. You can get these reports by contacting your regional office.

WHEN LAST TOP PRIZE IS CLAIMED

Periodically the Lottery must notify retailers that an instant-scratch game's last top prize has been claimed and that they must pull the game from their dispensers.

The lottery's decision to pull an instant-scratch game is out of fairness to all players: if the last top prize in a game has been claimed, players no longer have a chance at a top prize if they buy a ticket.

We appreciate the effort retailers put forth when they must pull a game from their dispensers and get them to their DSR for pickup. Retailers have done an excellent job removing tickets over the years.

What happens when the last top prize is claimed?

Some retailers may not be familiar with what goes on behind the scenes at the lottery as we track sales of instant-scratch games through our computer system. When a particular instant-scratch game's last top prize is claimed, our computer automatically generates a message that's sent to all retailers' terminals telling them to remove the game from their dispensers. Our goal is to have all remaining tickets from that game collected by our DSRs during their next visit to your store.

How to retrieve a message

When a message comes through the lotto terminal a pop-up message appears on the terminal screen. Retailers read the message and print it for other employees.

Tips for making the ticket retrieval process easier

- Make sure clerks are aware of what to do when a message is generated by the terminal about a last top prize being claimed.
- It's very helpful if a retailer has someone available to remove tickets from a safe if they store some there.
- It's also important to check the game number carefully so the proper tickets are removed from the dispensers. (For example, we have different versions of the Crossword game available. One version of the game may need to be removed from sale, while the other can remain. It is important that the correct game number is removed).

WHEN GAMES ARE ENDED FOR OTHER REASONS

The Lottery ends games for several reasons:

- The game has sold out.
- The game has a promotion associated with it and the game must end in enough time to allow people to enter their non-winning tickets.
- The game has stopped selling.
- The season is over for the game's theme (example: Holiday games).

Once the Lottery announces the end of a game, the DSRs will begin to return those tickets. In general, those games will be returned within two weeks of the game ending announcement, but must be returned within five weeks of the announcement.

ADDITIONAL LOTTO GAME INFORMATION

Lotto games that can be cancelled

Tickets from the Pick 3 and Pick 4 games **CAN** be cancelled.

Tickets must:

- Be cancelled the same day in the same store where they were sold.
- Be cancelled before the sales cutoff time for the game

Lotto games that cannot be cancelled

Tickets from the Powerball, Mega Millions, Lotto America and Lucky for Life games **CANNOT** be cancelled.

Ticket paper stock

Scientific Games, which provides the Iowa Lottery's statewide gaming system, is the primary source of ticket paper stock. You may order ticket paper stock through your lotto terminal's "Special Functions" menu by generating a supply request, or you may call Scientific Games at 1-800-858-4744.

How do I get supplies for my Lottery terminal?

Play slips for all lotto games and paper for the terminal are available from the vendor supplying the terminals. You can order these items on the terminal or by calling the retailer hotline.

Lotto pencils and play slip holders are available from the Lottery. You can get them from your sales representative when he/she is at your store.

STOLEN TICKETS

Lottery Security (515.725.7900) must be immediately notified if tickets are stolen from your business. Local law enforcement should also be contacted. The retailer should provide the Lottery with the game, pack and ticket numbers of the tickets that were stolen.

Lottery Security will enter the tickets into the Lottery computer system as stolen. After the tickets are marked as stolen, any attempt to cash those tickets will produce a security alert on the system.

When the tickets are marked as stolen on the system, the system will automatically settle the packs and they will appear on your weekly settlement report.

The Lottery will review the circumstances surrounding the theft of tickets and credit may be issued for the value of the tickets stolen. This review will include, but is not limited to:

- Was the loss due to internal theft?
- Were the tickets kept in a safe or other secured area?
- Is insurance coverage available for the loss?
- Is restitution ordered by a court?

After the review has been completed, credit for stolen tickets may be made at the discretion of the Lottery.
